How does this list grab you

For almost 50 years this was the best list of what happened to our airplanes from the the time I arriven in theFall of 1943 until the Spring of 1945 when I left. Empty spaces indicate that nothing bad happened to the airplane. About three of these were rebuilt.

I made this list at the time and not 50 years afterward and it has proven to be accurate.

Kirkpatrick had a list of all the accidents that he recorded in his log book. It came to light a few years ago. It is very detailed and accurate. Christy Hanks has really researched the accidents and has come up with a very comprehensive report. I worked on it with him so I have a copy. It is so extensive that I would have to mail it to you. Tell me how these came out
